Professional Summary

A resilient, analytical and motivated Computer Science Graduate from Aston University with experience in Software and Web Development using Python, Django, JavaScript, HTML and CSS. Developed web applications and database driven platforms through academic and team-based projects. Strong understanding of Agile methodology, debugging design. Eager to fulfil a challenging role where I can further develop my technical expertise, add value to the team, and contribute towards innovative digital solutions that support companywide success.

Technical Skills

- Web tech: JavaScript, HTML, CSS, Django, PHP.
- Databases: Confident with SQL and relational database design utilising PHPMYADMIN.
- Tools for practices: Sketch, GitHub, VS Code, Eclipse, Figma.

Professional Skills

- Communication and teamwork skills.
- Manage deadlines as well as deliver projects on time.
- Comfortable working independently or within a team.
- Adaptable and willing to learn technologies like Web Development and Computer Science.

Technical Projects

2025: Pain Symptom Tracking Web Application - [GitHub Link](#)

- Implemented database functionality for tracking user symptom data and history.
- Designed dashboards for data visualisation and symptom reporting.
- Built using development practices and deployed a functional MVP.

2024: E-Commerce Website – [Mobile Wave](#) [GitHub Link](#)

- Worked as part of a group to create an online shopping site.
- Implemented SQL database integration and backend functionality.
- Used GitHub and Trello for version control and Agile task management.
- Contributed to frontend development and responsive UI design.

Career History

2024 (Apr) – 2025 (Mar) – Software Engineer Junior (Intern) – Ether Services Ltd

- Learned to implement different functionality, debugged codes, and perform testing to make sure the codes operated.
- Participated in meetings and made code assessment and collaborate with senior engineers to develop software applications.
- Acquired practical knowledge about new technologies and tools and get mentoring from experienced engineers.

2024 (June) – 2024 (June) – IEUK Bright Network (One week Internship)

- Completed IEUK 2024 Technology Programme through Bright Network which provided me with knowledge about the tech industry and its associated career paths.
- Learned from experienced professionals through their presentations and their teaching sessions and their interactive question and answer sessions.
- Acquired essential abilities through my training which included understanding the industry dynamics and developing communication skills and establishing professional relationships.

2023 (Sept) – 2025 (Sept) – Second & Final Year Student (BSc Computer Science) – Educational Break

- Developed full-stack web applications using Python, Django and JavaScript.
- Applied methodologies in team-based and independent projects.
- Improved my problem-solving, debugging and system design skills in Computer Science.

2021 (Aug) – 2023 (Sept) – Warehouse Operative – Brandpath (Birmingham)

- Batched 2,000+ packages weekly for global clients including Google, while maintaining 100% KPI compliance.
- Improved stock accuracy by 15% through reorganising workflow and implementing tracking procedures.
- Worked with team members to exceed productivity targets by 20%.

2020 (Sept) – 2021 (Jun) – First Academy (Private College) – Educational Break

- Diploma Health & Social Care OCR Level 3 Btec (Equivalent to 3 A levels).
- Grade: DDM or 128 UCAS points.

2019 (Jun) – 2020 (Jul) – Zero Degrees Systems - Software Developer (Internship)

- Regularly ran update sessions with non-technical stakeholders.
- Gathered and analysed client's requirements, created use cases, personas, and storyboards.

2018 (May) – 2019 (Jun) – Receptionist – Aston Repair Centre (Birmingham)

- Managed 50+ bookings and enquiries with high customer satisfaction.
- Utilised Microsoft Office and internal systems to organise appointments.
- Reduced client waiting times by 10% through improved booking processes.

Education

BSc Computer Science – Aston University 2021 – 2025

- Software Project Management.
- Software Engineering.
- Artificial Intelligence.
- Human Computer Interaction.
- Data Structures and Algorithms.
- Information Security.

Additional Information

- Interested in modern web technologies and full-stack development.
- Consistently keeping UpToDate with technology advancements and trends through ongoing research.
